

Name of the Experiment

```
import java.text.DecimalFormat;
class Rectangle {
public static void main (String [] args) {
double width = 4.5;
double height = 7.9;
double area = width * height;
double perimeter = 2 * (width + height);
DecimalFormat df = new DecimalFormat("0.000");
System.out.println("Area: " + df.format(area));
System.out.println("Perimeter: " + df.format(perimeter));
}
```

what is the statement of KVL? It states that

System.out.println(")
System.out.println(")
System.out.println(")

class DisplayPattern

```
public static void main (String[] args) {
```

System.out.println("A")

System.out.println(" J A A V V A A")

System.out.println("j AAAA \n V V AAAA");

System.out.println(" } } A A V A A)

۲

2

```
c:\Users\Ae\Desktop\100P> java CommandLine
```

4.5 7.9

Area: 35.550

~~double height = Double.parseDouble~~

It 24064 → Name Most. Rokana Akter
import java.text.DecimalFormat;
